We are the approved dealer of IVECO commercial vehicles in South-East Wales. As well as new vehicle sales, we also offer a full range of services to commercial vehicle operators of all sizes, including maintenance, repairs, testing and calibration and 24-hour breakdown cover.

We have a dedicated Service Department which provides a full range of services to commercial vehicle operators from our well-equipped workshops in [Caerphilly in South Wales](#).

We aim to provide top quality service and believe this can only be achieved through comprehensive training. Consequently, our engineers and technicians are engaged in on-going training programmes in-house with manufacturers.

We offer maintenance contracts and servicing, and we have a dedicated [VOSA ATF lane](#). We also offer both digital and analogue tachograph testing, calibration and replacement, all of which can be booked in advance. For added peace of mind, our dedicated Parts Department hold a large range of quality spare parts in stock to ensure a quick turn-around of repaired vehicles.
